E-Learning Module on the Use of Force by Private Security Providers

This interactive E-Learning Module teaches the standards, requirements, and good practices that should be incorporated in national legislation, regulations, by-laws, as well as criteria for licensing, authorization, and registration with regards to the use of force by private security providers. Intended for public regulatory bodies as well as all stakeholders like civil society, companies and clients of private security, the module was developed by DCAF - The Geneva Centre for Security Sector Governance.
